

For Military or Commercial Use

Hydrasearch offers a wide range of layflat hose couplings, used in a variety of applications. Below is a sampling of some the styles we have to offer. We also will test our fittings to your hose if needed. Please call for more information.

Reattachable Layflat Hose Couplings

Thermoplastic Hose Style

This coupling is a light weight aluminum design with a 3 piece forged clamp design and "O"-ring seals. They also include two split clamps for connection. Each coupling is anodized for corrosion protection. We offer these as a male or female couplings available in 4" or 6" diameters.

Rubber Hose Style

This coupling is a light weight aluminum design with a 3 piece cast clamp design and "O"-ring seals. They also include two split clamps for connection. Each coupling is anodized for corrosion protection. These couplings are available in a male or a female and are designed for a variety of hoses.

Cam & Groove Style

This coupling is a light weight aluminum design with a 3 piece clamp design for the female coupling. Each coupling is anodized for corrosion protection. These couplings are available in a male or a female and are designed for a variety of hoses. Please call for size availability.

Menders

Hydrasearch offers many styles of hose menders. The one shown here is a 3 piece clamp design with a "O"-ring seal. It is constructed of light weight aluminum and is anodized for corrosion protection. Please call for styles and sizes available.
